BREWSTER BOARD OF HEALTH REGULATION RESTRICTING THE SALE OF TOBACCO AND NICOTINE DELIVERY PRODUCTS

THIS REGULATION INCORPORATES THE FOLLOWING:

1. The minimum standards required pursuant to the United States Food and Drug Administration on the sale and distribution of cigarettes; and
2. The minimum standards required pursuant to Massachusetts state law and regulation. This includes but is not limited to M.G.L. Chapter 270 regarding sales to those under the minimum legal sales age of 21, tobacco and vaping product sales including flavored products, required signage, matching definitions and other relevant state statutes and regulations, as of September 2020.

A. Statement of Purpose:

Whereas there exists conclusive evidence that tobacco smoking causes cancer, respiratory and cardiac diseases, negative birth outcomes, irritations to the eyes, nose and throat¹;

Whereas the U.S. Department of Health and Human Services has concluded that nicotine is as addictive as cocaine or heroin² and the Surgeon General found that nicotine exposure during adolescence, a critical window for brain development, may have lasting adverse consequences for brain development,³ and that it is addiction to nicotine that keeps youth smoking past adolescence⁴;

Whereas a Federal District Court found that Phillip Morris, RJ Reynolds and other leading cigarette manufacturers “spent billions of dollars every year on their marketing activities in order to encourage young people to try and then continue purchasing their cigarette products in order to provide the replacement smokers they need to survive” and that these companies were likely to continue targeting underage smokers⁵;

Whereas more than 80 percent of all adult smokers begin smoking before the age of 18, more than 90 percent do so before leaving their teens, and more than 3.5 million middle and high school students smoke⁶;

Whereas cigars and cigarillos, can be sold in a single “dose;” enjoy a relatively low tax as compared to cigarettes; are available in fruit, candy and alcohol flavors; and are popular among youth⁷;

Whereas research shows that increased cigar prices significantly decreased the probability of male adolescent cigar use and a 10% increase in cigar prices would reduce use by 3.4%⁸;

Whereas 59% of high school smokers in Massachusetts have tried flavored cigarettes or flavored cigars and 25.6% of them are current flavored tobacco product users; 95.1 % of 12 – 17 year old’s who smoked cigars reported smoking cigar brands that were flavored⁹;

Whereas the Surgeon General found that exposure to tobacco marketing in stores and price discounting increase youth smoking¹⁰;

Whereas the U.S. Food and Drug Administration and the U.S. Surgeon General have stated that flavored tobacco products are considered to be “starter” products that help establish smoking habits that can lead to long-term addiction¹¹;

Whereas the U.S. Surgeon General recognized in his 2014 report that a complementary strategy to assist in eradicating tobacco-related death and disease is for local governments to ban categories of products from retail sale¹²;

Whereas the U.S. Food and Drug Administration and the Tobacco Products Scientific Advisory Committee concluded that menthol flavored tobacco products increased nicotine dependence, decreased success in smoking cessation¹³;

Whereas menthol makes it easier for youth to initiate tobacco use¹⁴;

Whereas use of e-cigarettes among students in Massachusetts is 20.1%, representing a 78% increase for high schoolers and a 48% increase for middle schoolers from 2017 to 2018¹⁵;

Whereas the Massachusetts Department of Environmental Protection has classified liquid nicotine in any amount as an “acutely hazardous waste”¹⁶;

Whereas according to the CDC’s youth risk behavior surveillance system, the percentage of high school students in Massachusetts who reported the use of cigars within the past 30 days was 10.8% in 2013¹⁷

Whereas data from the National Youth Tobacco Survey indicate that more than two-fifths of U.S. middle and high school smokers report using flavored little cigars or flavored cigarettes¹⁸;

Whereas the Massachusetts Supreme Judicial Court has held that “. . . [t]he right to engage in business must yield to the paramount right of government to protect the public health by any rational means”¹⁹.

Whereas Communities that are densely populated with tobacco retailers make it easier for youths to obtain tobacco products. Also, because retail outlets are a key marketing channel for tobacco products, a high density of tobacco retailers in a neighborhood creates a concentration of tobacco marketing, meaning children, youth and adults living in those neighborhoods will be exposed to multiple environmental cues designed to encourage tobacco use.

Whereas Studies have shown that youth who live and go to schools in neighborhoods with the highest density of tobacco outlets (or with the highest density of retail tobacco advertising) have higher smoking rates compared to youth who live, or attend school, in neighborhoods with fewer or no tobacco outlets.

Whereas Studies have also shown that limitations on the number of tobacco retailers, combined with strong licensing requirements, has a positive effect on reducing youth smoking rates.

Now, therefore it is the intention of the Brewster Board of Health to regulate the sale of tobacco products.

B. Authority:

This regulation is promulgated pursuant to the authority granted to the Brewster Board of Health by Massachusetts General Laws Chapter 111, Section 31 which states "Boards of health may make reasonable health regulations".
