Currently, the PCR (polymerase chain reaction) Swab Test is the only test accepted by the MA Dept. of Public Health to confirm an active case of COVID-19. The antibody and antigen tests are only effective a minimum 5 days after exposure and requires a PCR Swab Test to confirm an active positive case. A positive antigen test will be treated as a probable COVID case and will be subject to isolation protocols. The PCR Swab Test is recommended for the most accurate results as accepted by DPH guidelines including the MA Travel Advisory (revised July 27, 2021)
